

# How We Made Giant, Fluffy Slime

## 1. White School Glue

(We used 5 bottles.)

## 2. Baking Soda

(1/2 t. for each bottle of glue.)

## 3. Foaming Body Wash

(1 squirt for each bottle.)

## 4. Shaving Cream

(1/4 c. for ea. bottle of glue.)

## 5. Food Color (optional)

(Lots of drops!)

## 6. Contact Lens Solution

(MUST contain boric acid or sodium borate.)

Put the first 5 ingredients into a bowl, one at a time, mixing well as you go. Squeeze in some lens solution, a bit at a time, and stir well. Keep adding more until the stuff pulls away from the bowl. If it gets too hard, mix in more shaving cream. The more you play with it, the better it gets! Have fun!
